### UnitTypeType Field

**Field Name (Standard Name):** UnitTypeType

<table>
<thead>
<tr>
<th>Definition (May contain rules that must be observed)</th>
</tr>
</thead>
<tbody>
<tr>
<td>This field is a list of the types used in the Unit Type repeating elements. The Type is a list of possible Unit Types, i.e. 1, 2, 3 or 2 Bed, Studio, Special Loft, etc. Each selected are expected to appear as the &quot;[type]&quot; in the related UnitType fields in a flattened implementation (RETS 1.x only) of the room fields. A relational implementation of UnitTypes must omit the type from the field name and use UnitTypeType to create a vertical representation of the various unit types. The fact that the field repeats the word &quot;type&quot; is intentional.</td>
</tr>
</tbody>
</table>
