

Data Dictionary Certification Levels

A Data Dictionary Certificate can be awarded for applicants achieving the certain compliance levels. As time goes on, the compliance level required to receive a certificate will be raised. Eventually, the only compliance level that will be awarded a certificate is Platinum.

The following table provides the minimum compliance level required for certification for the next six years. Additional information with regards to Data Dictionary Certification can be found in the RESO web page [Data Dictionary](#).

Year	2015-2016	2017	2018	2019	2020+
Effective	1/1/2015	1/1/2017	1/1/2018	1/1/2019	1/1/2020
Level	Core	Bronze	Silver	Gold	Platinum

Additional Notes

- The "Core" level is accepted as the certification minimum for two years; the remaining levels, only one year each.
- Certificates are good for one full year. They are NOT withdrawn even if the level used to award the certificate doesn't match the updated requirement at the beginning of the next calendar year.
 - For example: a "Bronze" certificate awarded in Dec 2017 is still good for the full 12 month. Renewing at any time in 2018 would require a Silver Level.
