Welcome to the Real Estate Standards Organization (RESO) Data Dictionary Wiki

Each version of the Data Dictionary describes and organizes the internationally recognized standards for terms and fields related to the transmission of real estate data within a tree structure.

Introductory material is followed by a list of resources, groups, fields and lookups. Dictionary items include a definition, attributes and points of integration.

Be part of the real estate data conversation! If you are not already a member, consider joining RESO's growing ranks. Membership includes free certification. | JOIN RESO

**Important for Certification**

*Data Dictionary 1.7 is the most current version for RESO certification testing purposes. Additional materials for certification can be found below.*

- Data Dictionary 1.7 Reference Sheet
- Data Dictionary 1.7 Specification
- RESO Commander

Data Dictionary 2.0 was approved December 31, 2021, and was officially closed for commentary on January 20, 2022.

It awaits final RESO Board of Directors ratification and the completion of testing rules ahead of becoming a certifiable standard.

Certification for Data Dictionary 2.0 is expected to begin during Q3 2022.

- Data Dictionary 2.0 Specification

**Mobile Users**

The RESO Data Dictionary is built upon Confluence, a web-based wiki. It is searchable within the Confluence app but the desktop version offers wider visibility of the left-side navigation pane.

**Acknowledgements**

The RESO Data Dictionary is a collaborative effort among numerous industry experts who volunteer their time, insight and expertise to the project. | LIST OF CONTRIBUTORS
